ZEPCAM T3 Mini-Camera

PRODUCT SHEET
T3-MC01

Always the perfect view

The T3 Mini-Camera can be positioned in many ways to provide remote support with the perfect view. It is a small and robust IP68 camera connected to the T3 bodycam for 4G livestreaming of high-quality videos to a central control room under all lighting conditions. The T3 Mini-Camera can be mounted on a variety of helmets to get the 'head view' of policemen, firemen, inspectors and engineers. Another option is to use the Mini-Camera on lightweight clothing such as emergency care uniforms, roadwork vests or private security shirts. The livestreams are recorded and can be viewed in a central

control room in real-time with very low latency with ZEPCAM Manager software or a suitable VMS system. The T3 Mini-Camera has the best-in-class video quality in any condition, from bright sun to pitch-dark due to the infrared function. The T3 Mini-Camera has LED indicators for de-escalation and is IP68 water and dust proof, making it suitable for a broad range of frontline professions. With the ZEPCAM T3 Mini-Camera your frontline professionals will never have to work alone!

Key Features

- ✓ Superb video quality under all lighting conditions
- ✓ Light and small to wear and use unnoticed
- ✓ Flexible mounting for optimal position and view
- ✓ Robust and IP68 water & dust proof
